

OIL & GAS

BUNKER SURVEYOR SERVICES

Reg No. 53235225D

OUR BUSINESS

Oil & Gas Bunker Surveyor Services, a strong emerging bunker surveying company, set up with the objective to provide a service quality level rarely achieved by surveying companies, based on industry standard. We will take charge onboard vessels on behalf of clients

and comply with all requirements for fuel inspection with an aim to eradicate or reduce risks and loss, facilitate and expedite transportation, minimize logistical costs by preventing unnecessary delays, which in summation would maximize trading profits.

Our commitment to our clients are aided by a team of technical experts and experienced support staff, with state-of-the-art laboratory assures our customers of independence, impartiality and accuracy of inspections/ testing/ calibration services; resulting in efficient issuing of certificates and competitive charges.

COMPANY PROFILE

Bunker shortage has always been the main teething issue that both supplier and vessel owner struggle to resolve amicably. As neither the vessel stake holder nor the supplier is present to witness the bunker transaction and sampling procedures onboard vessel, any post-delivery investigation on quantity shortages and quality dispute is usually futile and inconclusive.

Protests to relevant authority, demurrages, physical shortages, legal fees, time management, loss of goodwill, inconvenience and stress will only add on to the mammoth operating cost.
